

11 SUSTAINABLE CITIES AND COMMUNITIES

Make cities and human settlements inclusive, safe, resilient and sustainable.

The world's population is constantly increasing. To accommodate everyone, we need to build modern, sustainable cities. For all of us to survive and prosper, we need new, intelligent urban planning that creates safe, affordable and resilient cities with green and blue environments and culturally inspiring living conditions. This includes protecting the natural environment and reducing the effects of water-related natural disasters like floods. We also need to think about the increased demand on drinking water for these future communities.
